288 KM OF SKI RUNS

80 REFRESHMENT STOPS

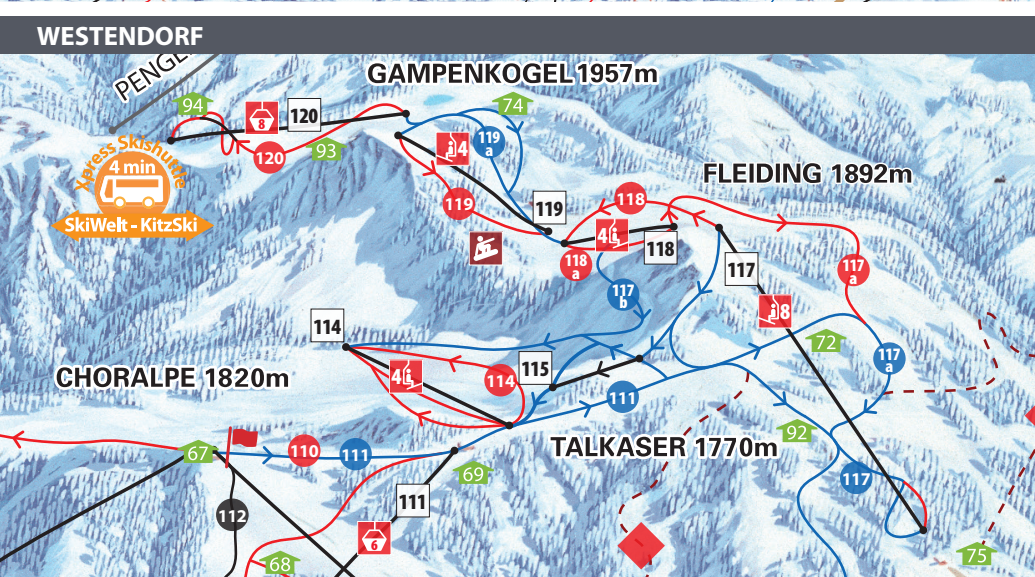

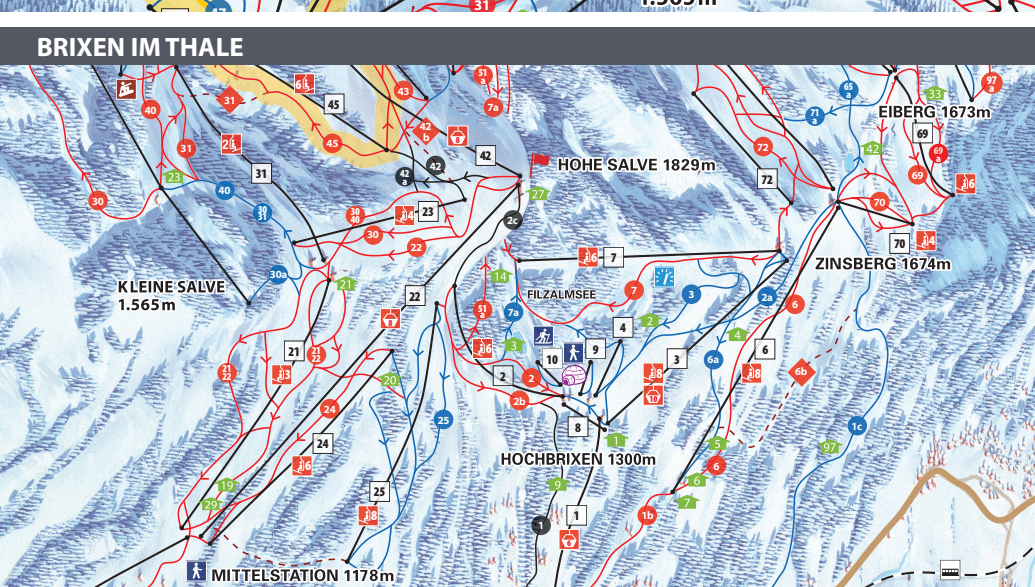

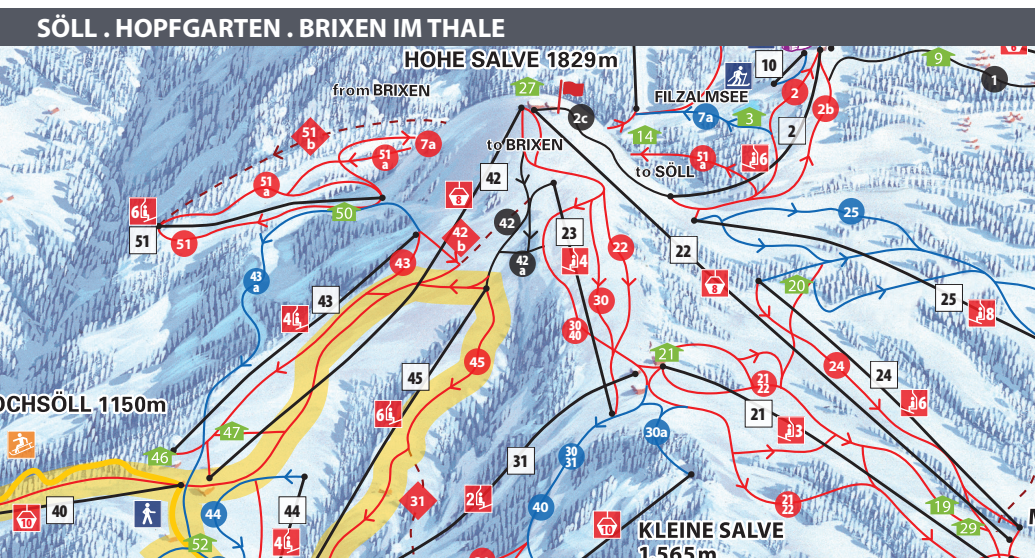

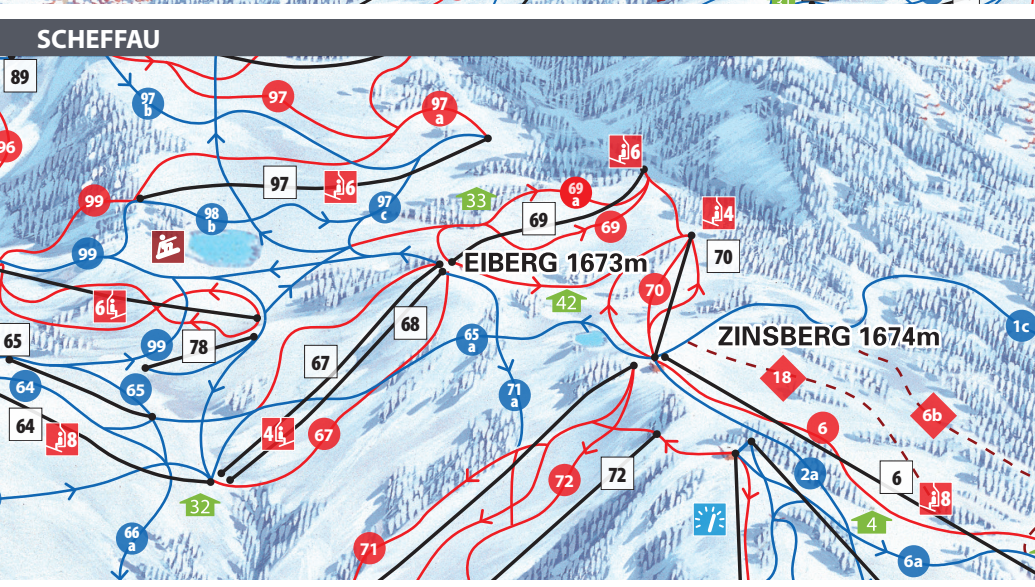

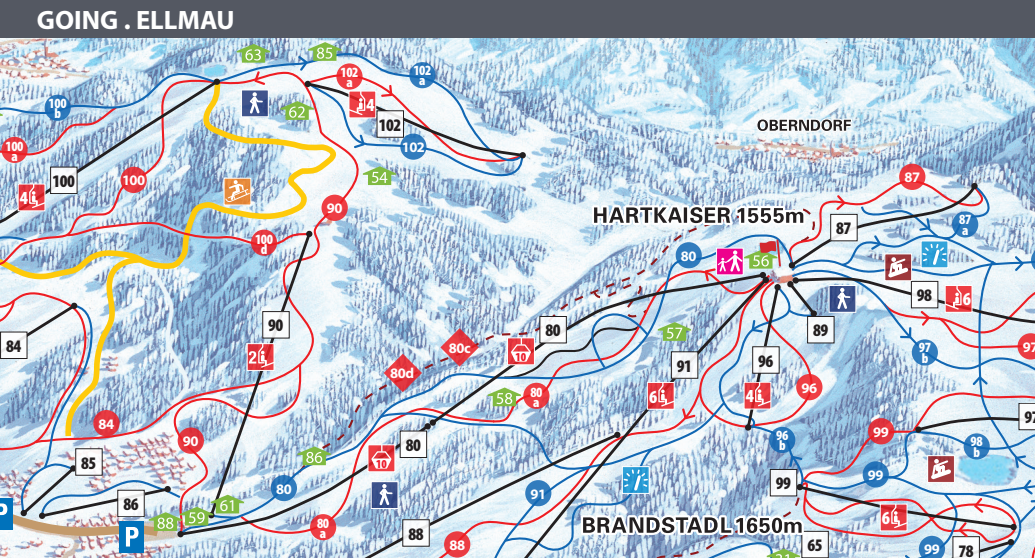

90 CABLE CARS

SkiWelt
WILDER KAISER BRIXENTAL

www.skiwelt.at

WOW! SO MUCH DETAIL

WOW! SO ECO-FRIENDLY - FOR 43 YEARS SKIWELT HAS PUT REGIONALITY FIRST!

SKIWELT RESORT

- All 90 lifts of SkiWelt are 100% operated with eco-electricity
- Ecological footprint: the Federal Environment Agency confirms that mountain holidays are among the most climate-friendly types of travel
- Mobility: cooperation with the railways, free shuttle services and expansion of e-mobility infrastructure to reduce the number of car journeys
- 2008 - first solar lift in the world
- Heat recovery systems to support the heating system (heating of the mountain stations, valley stations or ski lifts in the ski area)
- Our own SkiWelt waste separation system
- Continually new environmental projects in the future

RECIPE FOR ARTIFICIALLY PRODUCED SNOW - 100% ECO-FRIENDLY

You take ...

- the SkiWelt's professional snowmaking team
- the most efficient snow guns, water of drinking water quality from our 16 snowmaking lakes, which fill up automatically in summer
- 100% green electricity produced by the Tyrolean Hydropower Company (Tiroler Wasserkraft)
- suitable temperatures in which humidity also plays a major role

... and you get artificially produced snow, which will eventually melt back into nature's water cycle.

- Wow! So efficient: Over 20% savings in artificial snow production through the nationwide use of our own GPS snow grooming measurement system in the SkiWelt snow groomers

REGIONALITY

- 80 rustic family-run huts with sun terraces and service are waiting. On average there is a refreshment stop every 3.3 km.
- Sustainability: we pay attention to regionality and sustainability in all our family-run huts
- Regionality: the operation and processing of local products helps to strengthen local economic structures and minimize transport costs
- Use of heat recovery from the gondola operation to heat the mountain restaurant
- Charging stations for electric vehicles

www.skiwelt.at/ecological
