## Wonderful view

The chalet is located opposite Diemtigen with a view of the mountains, the Diemtigtal and the village Diemtigen.

## \*\*\*\*Apartment

Due to the high standard of construction our apartment is classified by Swiss Tourism STV as a first-class holiday apartment.

## Exclusive and comfortable

The apartment has three separate bedrooms, a spacious living and dining area with two sofas and armchairs, a library, a Swedish stove and a separate dining table for six people, south-facing and east-facing balcony, a modern kitchen with a ceramic hob, a washing machine, an oven and a fridge. The large bathroom has a bathtub and shower. Facilities include a Nespresso coffeemaker with enough free capsules, free Wi-Fi and a car park.

## Sustainable

From 2012 - 2015 the whole chalet has been renovated according to ecological criteria. The insulation of the building envelope with sheep wool creates a pleasant room climate in summer and winter. Only indigenous woods have been used in the interior, mainly from the Diemtigtal and from our own forest.

The heating is done with renewable energy in the form of wood from our forest. The photovoltaic system produces just under 10,000 kWh per year and therefore enough electricity for the three apartments in the chalet.
